

Project Design Phase
Proposed Solution Template

Date	30 september 2026
Team ID	SWTID-2026-4655
Project Name	AIFAQ Assistant
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Users often spend time searching for answers to frequently asked questions. Traditional FAQ systems may provide static information and may not understand natural-language questions. The proposed system solves this problem by providing quick and relevant answers using an AI-powered FAQ assistant.
2.	Idea / Solution description	The proposed solution is an AI-based FAQ assistant that allows users to ask questions in natural language. The system processes the user's query, searches the available FAQ/knowledge base, and provides a relevant answer through a simple chatbot interface.
3.	Novelty / Uniqueness	The system uses Artificial Intelligence and Natural Language Processing (NLP) to understand user questions instead of depending only on exact keyword matching. It provides conversational responses and can be continuously improved by adding new FAQ information and user feedback.
4.	Social Impact / Customer Satisfaction	he system provides quick and easy access to information, reduces waiting time, and improves the user experience. It can help organizations provide 24/7 support and reduce the workload of customer-support staff.

5.	Business Model (Revenue Model)	The system can be offered as a subscription-based service for organizations. Revenue can be generated through monthly or annual plans, premium features, customization, and enterprise-level deployment.
6.	Scalability of the Solution	The system can be scaled to support a large number of users and FAQs. The knowledge base can be expanded with additional information, and the system can be integrated with websites, mobile applications, and other customer-support platforms.
